1. Process of developing project

preliminary

intermediary

final

1*
Define + Research

Research Question
How might we contribute meaninfully
to early childhood development?

3
Prototype

Build installation modules:
- LED + Sensor Array (arduino, processing)
- Website (HTML/CSS/p5.js)
- Design form for Cat
- Materials Testing (fabric swatches, light color testing, etc.)

5
Build + Install

Bring together modules
to create full scale installation

Will open May 2017 at
Crocker Art Museum

2*
Concept Development

Gato Nuestro - See Project Description

4
User Testing

Conduct focus groups
at Crocker, via our assigned
Museum Researcher (Erin Gong)

iteration
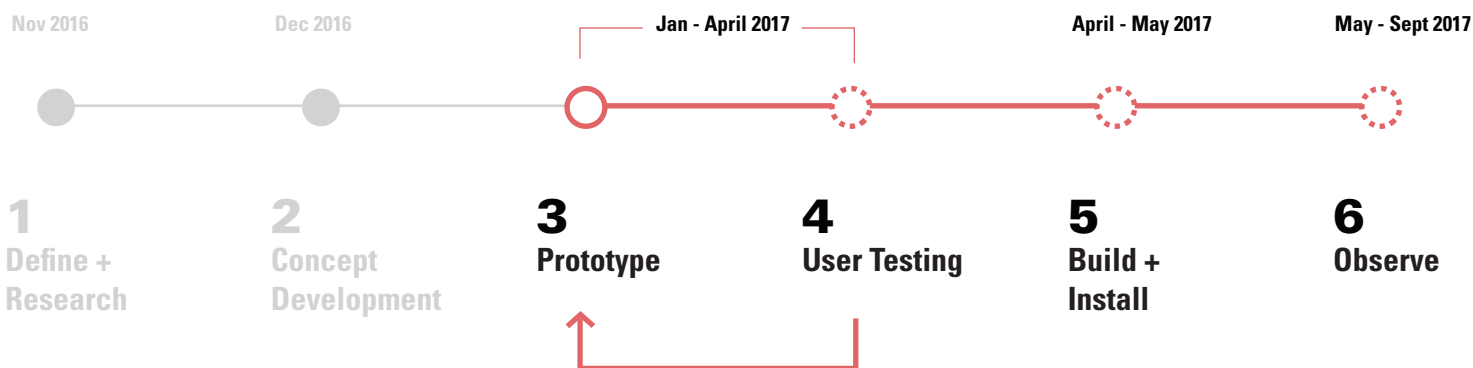

6
Observe + Document

- Observe Project Outcomes and analyze if project expectations were met
- Document project assets to be used for future projects and to release as open source technology

*complete

2. Timeline of Work

Nov 2016   Dec 2016   **Jan - April 2017**   **April - May 2017**   **May - Sept 2017**
